PROFILE

Design engineer with experience in frontend development and product design since 2021. Connects Figma flows and design systems with React interfaces and API integrations. Independent work spans end-to-end product development and AI-assisted engineering workflows, with explicit constraints, review and verification.

EXPERIENCE

Acesso Energia — Frontend Development & UI Design

October 2021 – Present · Scope across roles

- Designed and maintained 1,000+ screens and 200+ product flows in Figma across internal platforms, client portals and mobile experiences.
- Created the company's core design system, establishing reusable interface patterns and responsive behavior.
- Built frontend interfaces and reusable components with React, JavaScript and Tailwind CSS, integrating APIs and collaborating across technical and business teams.
- Led the migration from vanilla CSS to Tailwind.

Ômega Digital Center — Technical Support & Infrastructure

March 2019 – October 2021 · Scope across roles

Provided technical support, maintained network infrastructure and investigated incidents to support operational continuity.

SELECTED INDEPENDENT PROJECTS

B-Boss Club — Product design & engineering

Pilot testing · React, TypeScript, TanStack, Fastify, Prisma, PostgreSQL

Lead UX/UI and implementation for a barbershop product connecting customer journeys, business operations and administration. Shared packages in an Nx workspace support consistent interfaces and data contracts across applications.

Allumove — Interaction design & frontend

Product decisions and React interface development for a rental platform. Replaced an opaque qualification score with explicit criteria, status and follow-up actions in a working prototype.

Pandora — Agent workflows & developer tooling

Personal operational use · TypeScript, Python, Claude Code, Codex, MCP

Structure task context, acceptance criteria, integration requirements and review of agent-assisted changes. Work includes execution visibility, operational checks and documenting the boundaries between proposed, implemented and verified behavior.

SKILLS

React · TypeScript · JavaScript · Tailwind CSS · Figma · UX/UI · Design systems · REST API integration · Git/GitHub · Technical documentation · AI-assisted development

Independent project stack: Node.js, Fastify, Prisma, PostgreSQL, agent workflows and MCP.

EDUCATION

FIAP — Postgraduate studies, Full Stack Development · 2025–2026
FIAP — Associate degree, Systems Analysis and Development · 2021–2022
Google — Foundations of User Experience (UX) Design · 2023
